

Quality is the lifeblood of industrial products; every screw is the object we concerned.

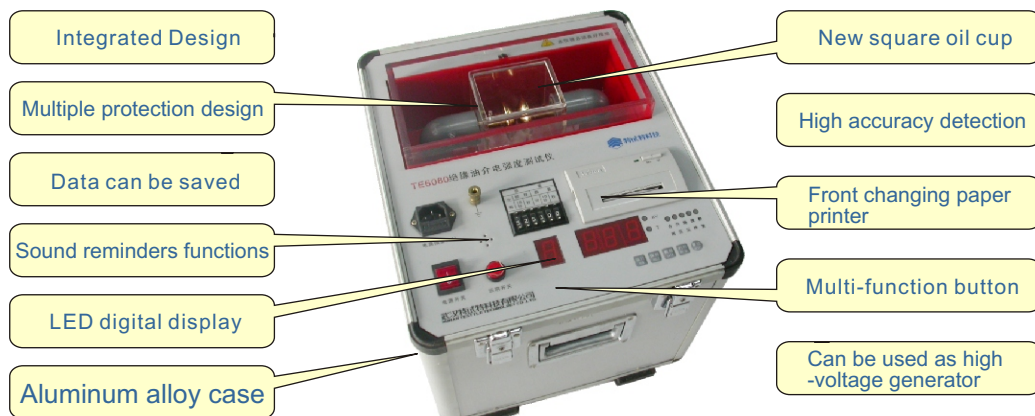

● TE6080 Automatic Insulating Oil Tester

● Brief Introduction:

It is a new product in accordance with the International Electrotechnical Commission standard IEC156. Used for transformers, circuit breakers and other insulating oil dielectric strength of automatic test equipment.

TE6080 portable insulating oil tester, realize the full automatic determination of insulating oil dielectric strength, make the original tedious and dangerous work become safe and easy. The instrument adopts special software and hardware anti-interference measures to eliminate the competing products prone to crash phenomenon. The new design will reduce the volume to the 1 / 2 of original, easy to carry and operate on-site.

● Appearance and configuration:

● Main features:

- ◆ High degree of automation: auto mixing, auto-standing, automatic step-up, automatically record the breakdown voltage, automatic cut power and go back to zero, automatically calculate the average, auto-print.
- ◆ Multi-layer anti-interference design of hardware and software, effectively eliminating the phenomena of system halted, run error and so on caused by strong electromagnetic interference in the operation.
- ◆ Integrated design, easy to carry.
- ◆ Breakdown Protection: it can cut off the high voltage of the oil cup within 10ms after the breakdown of the oil sample.
- ◆ Multi- protection, operational safety.

● Technical Parameters:

- ◆ Power supply: Voltage: AC220V±10% Frequency: 50Hz±1Hz
- ◆ Service condition: Ambient temperature: -10℃~40℃
Relative humidity≤90%RH

- ◆ Measurement Accuracy: $\pm (2\% \times \text{readings} + 1\text{kV})$
- ◆ Step-up rate: $2.5\text{kV/s} \pm 10\%$
- ◆ Output voltage: AC $0 \sim 80\text{kV}$
- ◆ Preset times: $1 \sim 9$ Times
 - Stirring time: $0 \sim 99$ Seconds
 - Silent pause $0 \sim 10$ Minutes 39 Seconds
- ◆ Dimensions: Length 310mm * Width 330mm * Height 324mm
- ◆ Weight: 22kg
